

# Fleetclear Connect

## FleetclearTrack – Quick Self-Install Guide (FC100)

### What You Need

- FC100 tracker supplied by Fleetclear
- Alcohol wipe to clean the battery shell
- Spanner (usually 10mm)
- Access to your vehicle's battery

### Fitting the Tracker

- Mount the device on or near the vehicle battery (label side facing up).
- Connect Power (Two Wires Only)
- Red → +12/24V permanent power (battery + terminal or permanent fuse feed)
- Black → Ground (battery – terminal or clean chassis point)
- Ensure the connection is tight and cannot pull loose
- Remove the self-adhesive covering from the back and apply to your battery to keep in position
- Where wires extend outward, add two small cable ties as needed to flatten and secure them.

### Final Checks

- Your device should power up automatically
- Secure and tidy cables, then close the bonnet, restore trim
- All trackers are pre-configured with the vehicle registration and/or asset IDs prior to dispatch
- Login to your Fleetclear Connect account by visiting [app.fleetclear.com](https://app.fleetclear.com) on your browser – you should have received login details for your account prior to receiving the tracker
- Your asset should appear in your account within a few minutes

### Support

If the device doesn't appear online:

- Re-check red/black connections and confirm battery contacts are clean and tight
- Ensure mounting label faces upward
